

VitaDSL

GUARANTEED BANDWIDTH. ANYWHERE.

You need fast upload as well as download speed. 1:1 contention is essential. You have no SDSL at the exchange, or your site distance from the exchange means SDSL is not viable. Think locking into an expensive leased line contract is your only option?

Think again...

Fusion is proud to launch VitaDSL, at 1:1 contention this is the totally uncontended product that bridges the gap between Leased Lines/SDSL and ADSL.

More and more organisations require faster upstream bandwidth at the lowest possible contention in order to stream data and run complex networks.

Fusion VitaDSL is a solution "Out of the box" that provides service speeds of either 512Kb/512Kb, 1Mb/832Kb or 2Mb/832Kb at guaranteed 1:1 contention.

Key Features of VitaDSL:

- 1:1 Contention
- Available to 98% of the UK population
- Ideal for real-time applications
- Leased line equivalent
- Enhanced Service Level Guarantees

Vita DSL is provided inclusive of a dedicated PSTN line which is managed by Fusion. Costs below include line rental and enhanced care on both telephone line and broadband service.
