

Ethernet prices continue to fall, and in some areas we can now offer 10Mb 1:1 contention circuits for less than £500 per month.

Many clients are now considering Ethernet and Ethernet First Mile as the natural process to upgrade from their existing ADSL or SDSL service. As an existing Fusion customer, you can usually retain the same IP addressing range over your new, higher bandwidth connection. Contact your account manager today to check availability and provide a free, no obligation quotation.
