

The new Fusion web site launched on 17th June 2010 with the aim of providing a more dynamic and involving platform for showcasing our products and services.

The “FMN” brand is now consigned to the archives and the new Fusion branding (with the “liquid” O) has been applied across the board. The new user friendly web site is designed to interact with our other platforms , so now you can raise a support ticket via the site, and soon you will be able to access our Partner Portal, view network status and statistics and even drill down to your own line’s performance and router stats via our new Managed Hardware service. As ever, we welcome and appreciate any feedback on our products, customer service, and the new site.
