

We're experts at delivering well designed, resilient, scalable and manageable networks no matter your requirement.

Single Site Connectivity

You need internet access, but standard connectivity isn't enough. Contact us, explain your requirement and we'll work out how to achieve it.

Multi Site Connectivity □

Need resilience at the head-office? Need to make sure your core applications and services function seamlessly? Want to collaborate with your colleagues using VoIP and Video Conferencing? Remote staff need access to the network? Want a single point of administration?

IPVPN is the obvious choice of VPN technology for multisite companies, and Fusion will make the technology work for you. No matter what's running on your network we'll prioritise, route, failover, backup and optimise your data. We'll learn your business, your network, your requirements. We'll deliver on time and on budget.

Bespoke networks

Need to connect with international offices?

You provide a service to your clients and want to deliver access to your systems securely and with guarantees?
